

Blemish Spot Treatment

Description

The Blemish Spot Treatment is a spot treatment to clear the pores and alleviate breakouts.

- Soothes skin irritation
- Has anti-inflammatory-like properties
- Clarifies breakouts
- Assists in boosting hydration levels
- Limits scarring

Skin Types

Acneic skin

Key Ingredients

- **Glycolic Acid (5%)** is a deeply penetrating alpha hydroxy acid that reduces wrinkles and promotes resurfacing to refine skin texture. It provides progressive skin clearing and promotes cellular renewal that expedites the healing of breakouts.
- **Salicylic Acid (1%)** penetrates the pores to dissolve impacted sebum that causes blackheads. It exfoliates the skin and reduces redness and inflammation associated with pustular breakouts.
- **Spin Trap (Phenyl t-Butylnitron)** entraps reactive oxygen species to restore proper chemical structure and spin to destructive molecules. It also limits lipid peroxidation and free radical damage.
- **Fructooligosaccharides (D-beta)** is a naturally occurring carbohydrate derived from cane or beet sugar and promotes growth of healthy probiotic bacteria to strengthen skin immunity. It is a humectant and skin conditioning agent.

Tips for Use

- Use 2 – 3 times per day to rapidly minimize blemishes.
- The serum can be applied over makeup because it will penetrate through the makeup.

Blemish Spot Treatment

Important Notes

Always wear sunscreen when using this product.

Formula Composition

Aqua (Water)
Glycerin
Caprylic/Capric Triglyceride
Glycolic Acid
Coco-Caprylate/Caprates
Cetearyl Alcohol
Cetearyl Glucoside
Glyceryl Stearate
Dicaprylyl Ether
Gluconolactone
Salicylic Acid
Xanthan Gum
Sodium Benzoate
Lithium Magnesium Sodium Silicate
Acetyl Tributyl Citrate
Hamamelis Virginiana (Witch Hazel) Water
Fructooligosaccharides (D-beta)
Alcohol
Glucosamine HCl (D)
Phenyl t-Butylnitrone (Spin Trap)
