

Cranberry Turnover Peel

Description

Professional Use Only. The Cranberry Turnover Peel is a powerhouse product that exfoliates and reduces oil with a creamy consistency and 20% salicylic acid cranberry mixture.

Tingle factor: 8

pH: 3.53-3.93

- Resurfaces and refines the skin and pores
- Removes oil and debris
- Excellent antioxidant
- Inhibits inflammation

Skin Types

Normal to oily and acneic skin

Inflamed and pustular acne

Key Ingredients

- **Salicylic Acid (20%)** provides exfoliation, preventing pore clogging. It also provides anti-inflammatory-like benefits from pustular acne.
- **Cranberry Fruit Extract** is a nourishing antioxidant that offers antibacterial properties.
- **Witch Hazel** is a flowering plant; it is a strong antioxidant and astringent that is often used as a natural remedy for psoriasis, eczema, and other skin conditions.
- **Allantoin** soothes and calms the skin. It also relieves itching and irritation.

Tips for Use

- Prepare Fitzpatrick's 4-6 with tyrosinase inhibitors (Glycolic & Retinol Pads) for 1 – 2 weeks prior to use to avoid post-inflammatory hyperpigmentation.
- After cleansing and degreasing, apply Cranberry Turnover Peel with a fan brush. The client will experience a hot sensation for about five minutes. Offer to fan the client's skin.
- Remove with cool water. Since salicylic is a beta hydroxy acid, it will self-neutralize.
- Apply sunscreen after use.
- Let the client know to expect flaking in 4 – 5 days.
- If the client has a full face of acne, apply the peel all over. Otherwise, spot treat.

Cranberry Turnover Peel

Important Notes

Avoid contact with eyes, and flush immediately if contact occurs.

Always use sun block after using this product.

Check with your client for aspirin allergies or sensitivities.

Formula Composition
