

# Glycolic and Retinol Pads

## Description

---

Glycolic & Retinol Pads are designed to gently and progressively renew the skin to provide brightening, clarifying, and restoring benefits to all skin types in need of perfecting.

- Brightens the appearance of pigmentation spots
- Assists with surface renewal and resurfacing
- Lessens future breakouts
- Assists in anti-wrinkle actions

## Skin Types

---

All skin types and all Fitzpatrick's  
Hyperpigmentation, melasma  
Oily and acneic skin

## Key Ingredients

---

- **Arbutin (4%)** limits melanin production and reduces visible pigmentation through lightening actions and the inhibition of tyrosinase.
- **Kojic Acid (3%)** inhibits tyrosinase and brightens existing pigmentation naturally. It is comparable to hydroquinone without the negative side effects.
- **Glycolic Acid (2%)** is a deeply penetrating alpha hydroxy acid that reduces wrinkles and promotes resurfacing to refine skin texture. It provides progressive skin clearing and promotes cellular renewal that expedites the healing of breakouts.
- **Retinol (1%)** is a Vitamin A derivative that exfoliates to stimulate collagen production and reduce visible signs of aging.

## Tips for Use

---

- Use the Glycolic & Retinol Pads 2 – 3 times per week for pore refinement or acneic skin. For best penetration of this product, use with the Glycolic Cleanser and/or Retinol 2% Exfoliating Scrub/Mask.
- For hyperpigmentation or melasma, use daily morning and evening to spot treat, applying only to pigmented areas. Reduce frequency after pigmentation has lightened.
- Do not rinse; let the product stay on the skin.
- If a client is going through a peel series, have them use pads twice per day then use as needed once the desired correction is reached.
